

## Andrographis paniculata (King Of Bitters): Enemy Of Diabetes

Diabetes is a serious condition in the body system, which is capable of affecting the entire body and is getting much in our society today, because both the rich and the poor are facing this challenge. The use of orthodox medicine is not easy because of the cost and the side effects of the synthetic drugs. This book will help you to know how diabetes can be cured with the use of herbs without spending money on drugs again.
